

We are asking ALL patients and visitors to please wear a face covering or mask when inside the Practice

Wearing a face covering helps to reduce the spread of coronavirus from anyone who is infected but is pre-symptomatic or asymptomatic, meaning they aren't yet showing any symptoms.

This face covering could be a scarf, bandana or homemade mask. Ideally, we are asking that a surgical mask should not be used as it is important that these remain available for frontline NHS and Care staff.

However **IF** you arrive at the surgery and do not have your own face covering please let the Receptionist know as soon as you enter the building.

Many patients now arriving at the practice already wear their own masks, which we really appreciate.

We are also asking that patients come in for their appointments alone where possible, to further reduce the risk of any infection being spread.
